Subject and specialization of export

- The Ukrainian company ARB VECTOR LLC was established in December 2021 and successfully exports vegetable oils to the EU countries.
- The export article is vegetable oil obtained from crops such as sunflower, rapeseed, soybeans.
- The main specialization of the company is the export of unrefined vegetable oils (in bulk) for industrial applications, for example, for the production of biofuels, paints and varnishes, etc.

Export capacity

- In connection with the Russian military aggression against Ukraine, as well as the invasion and occupation of part of its territories, there is no business stability. Therefore, adjustments may be made to the declared capacity for the export of vegetable oil.
- According to the terms of Incoterms 2020, we have the following options for the shipment of unrefined sunflower oil (in bulk):
 - on DAP terms - up to 1000 t/month.
- Sunflower refined deodorized oil (packaged):
 - on DAP terms - 300 t/month.
- The capacity of supplies may vary depending on the terms of payment, force majeure, and others.

Additional opportunities for the export of vegetable oil

- In addition to the main specialization, the company has the ability to carry out export deliveries of refined deodorized oil, both in bulk and packaged.
- It is possible to fulfill an individual order for quality.
- At the request of the buyer, we produce products with a private label.

Documentary support of export delivery

- Any batch or volume of export supply of vegetable oil is accompanied by the necessary customs package of documents, namely:
 - - specification;
 - - movement certificate;
 - - customs declaration;
 - - invoice;
 - - cmr;
 - - quality certificate.

Additional documents are available upon request.
