

# Introducing ThruGreen for Transit Signal Priority

ThruGreen is an innovative solution for smart cities to enable 2-way communication with signalized intersections. Our patented solution quickly and securely connects existing signalized intersections with our network, enabling cities to provide public transit vehicles with signal priority without the need to upgrade traffic signal controllers, cabinets and equipment.

## Why cities choose **ThruGreen**

Our functionality enables cities to quickly and cost effectively provide signal timing priority for their public transit fleet.

**Fleet Management System  
Integration via API**

**Citywide and Intersection-Level  
Rules & Schedules**

**Prioritization  
Reporting and Analytics**

**Multimodal Support  
and Configuration**
