

Filkon Factory

Ukraine, Kyiv

- “Filkon Factory” is a full-cycle private enterprise which specializes in the manufacture of filter fabrics and finished sewn products from such fabrics.
- The factory has production equipment in the textile unit and cutting-sewing unit located in its own premises with the area of over 3000 square meters.
- Currently, the factory is mostly sewing filter products to equip the primary filtering equipment of mining enterprises and food factories. The factory’s production capacity allows manufacturing more than 1,200,000 meters of filter cloth and more than 600,000 finished filter sewn products per year.

- The factory manufactures over 50 types of filter multifilament, monofilament and combined fabrics. Since 2007, the factory's technical specialists and managers have been working on the concept of developing and implementing filter fabrics of innovative generation.
- The main differences of such fabrics are: the single “working” side, increased flexibility and resilience of multifilament heat-shrinkable filter fabrics. Today, we manufacture over 20 types of such filter fabrics with specifically designed physical and mechanical characteristics. All the said fabrics stand out for their enhanced performance and improved specifications.

- The factory has implemented and uses a quality control system complying with ISO 9001. The factory's laboratory daily monitors the quality of purchased threads and finished products in accordance with DSTU (National Standards of Ukraine) and registered specifications

- The recognition of the “Filkon Factory” products quality is proved by the fact that our factory is a partner and ensures the production processes of more than 100 enterprises in Ukraine, Bulgaria, Kazakhstan, Georgia, Moldova, Uzbekistan and Turkmenistan. Among the partners of “Filkon Factory” are such well-known manufacturers as ArcelorMittal, Metinvest, Ferrexpo, Südzucker, Astarta-Kyiv, Pfeifer & Langen.
