

# Introducing ThruGreen for **Virtual Pushbuttons**

ThruGreen is an innovative solution for smart cities to *enable 2-way communication with signalized intersections.*

Our patented solution quickly and securely connects existing signalized intersections with our network, enabling cities and crosswalk providers to let pedestrians utilize crosswalks without having to push physical buttons.

## Why cities and crosswalk providers choose **ThruGreen**

Our solution enables cities and crosswalk providers to digitize crosswalks, providing capabilities such as:

**On-Demand Pushbutton  
Counting & Analytics**

**Virtual Pushbutton App**

**Crosswalk Status  
Testing & Alerts**

**Plug and Play Installation**
